Seat Belts for Forklift

Seat Belt for Forklift - This guideline purpose is to explain the Regulation requirements for the utilization of driver seatbelts or restraints on lift trucks. It is the employers' responsibility to be able to make sure that each and every machine, piece of equipment and device inside the workplace is chosen and utilized properly and operated in accordance with the manufacturer's directions.

With regards to their maintenance, inspection, fabrication, use and design Rough Terrain lift trucks need to meet the guidelines of ANSI Standard ASME B56.6-1992.

Mobile machines like side boom tractors along with a Rollover Protective Structure (ROPS), need to have seat belts which meet the Society of Automotive Engineers Standard J386 JUN93, Operator Restraint System for Off-Road Work Machines. If whatever mobile equipment has seat belts required by law, the driver and subsequent passengers have to ensure they utilize the belts whenever the motor vehicle is in motion or engaged in operation since this can cause the equipment to become unbalanced and therefore, unsafe.

When a seat belt or different driver restraint is required on a forklift.

While operating a forklift, the seat belt requirements will depend on some factors. Contributing factors to this determination might include whether the the lift truck is outfitted together with a Rollover Protective Structure, the type of lift truck itself and the year the lift truck was actually manufactured. The manufacturer's directions and the requirements of the applicable standard are referenced in the Regulation.

With regards to powered industrial lift trucks, ANSI Standard ASME B56.1-1993 refers to a driver restraint device, system, or enclosure. An operator restraint device, enclosure or system is intended in order to help the driver in lessening the danger of entrapment of the torso and/or head between the truck and the ground in the event of a tip over. The system or restraint device might include a seat belt, although a seat belt is not essentially a part of such machine or system.
